Umbell. 47 (1888). *Oxypolis rigidus*, var. *longifolius* Britton, Mem. Torr. Bot. Club, v. 339 (1894).—It is to be noticed in regard to this combination that the specific name should retain its earlier form, *rigidior*, and not be changed as by several recent writers to the positive degree. The restoration of the varietal name *ambigua* is necessitated by Art. 48 of the Vienna Rules and rests upon the fact that *ambigua*, not *longifolia*, was the name first applied to this plant in the varietal category.

THE DISCOVERY OF CRYPTOGRAMMA STELLERI IN MAINE.—*Cryptogramma Stelleri* (Gmel.) Prantl (*Pellaea gracilis* Hook.) has not been reported, I believe, from Maine. On July 29, 1906, I found it growing in abundance at Berry Ledge in West Paris. The plants were not on limestone, but upon a coarse granitic formation. When acid was applied to the rock, however, it caused effervescence, showing the presence of lime in the rock.—WALTER L. BACON, Norway, Maine.
